

**PROJECT LOCATION**

Kentlands, Gaithersburg, MD

**CLIENT**

Long & Foster Real Estate

**SCOPE**

New Building  
20,000 SF

**DESCRIPTION**

This new building represented the second version of a new prototype regional office facility for corporate real estate operations. The two story building had to consist of traditional architectural finishes to meet Kentland community requirements such as brick, slate hip roof, operable residential window style, and rooftop dormers. Interiors were completed, divided, and finished in custom floors, extensive wood trim & moldings, built-in stained wood millwork, wall paper, and elaborate paint.

**ARCHITECT**

Soma Architects  
Alexandria, VA
