

PROJECT LOCATION

Rockville, MD

CLIENT

The Container Store

SCOPE

Interiors
23,000 SF

DESCRIPTION

Starting with the original build-out of the store within the shell building, including storefront and loading dock facilities, the upgrade and renovation of this operating store to new, corporate design standards was accomplished. This included new lighting, floors, ceiling treatments, bathroom, dock, and store room reconfiguration, using phased construction and temporary barriers to permit continued opening to the public. Extensive pre-construction planning was necessary with the Owner to ensure success.

ARCHITECT

Good, Fulton & Farrell Architects
Dallas, TX
